Defendant.

Case No. 23-cv-03579-SI (JCS)

**DECLARATION OF MARK LANGAN IN
 SUPPORT OF DEFENDANTS' OPPOSITION
 TO PLAINTIFF'S MOTION FOR SUMMARY
 JUDGMENT (Fed. R. Civ. P. 56)**

Hearing Date: December 19, 2025

Time: 10:00 a.m.

Place: Videoconference

Trial Date: February 17, 2026

DECLARATION OF MARK LANGAN

I, Mark Langan, declare as follows:

1. I am a Senior Information Systems Analyst at San Francisco's Department of Building Inspections ("DBI"). I have been a Senior Information Systems Analyst at DBI since September 2016. I have personal knowledge of the contents of this declaration, and, if called upon to testify, I could and would testify competently to the contents of this declaration.

2. DBI stores all records of permit applications, permit plan reviews, and permit issuances in a system call the Permit Tracking System ("PTS"). DBI's PTS system is searchable and can determine actions such as scheduling, assigning and resulting building inspections.

3. I conducted a search of DBI permit application number 201810183586 for 200 Naples Street in San Francisco, California.

4. Attached as exhibit A to this declaration is a true and correct copy of a spreadsheet showing the search results I conducted for permit application number 201810183586.

5. In order to create the spreadsheet attached as Exhibit A, I first searched for the inspections associated with the permit in question. For those inspections, I queried our inspections audit table (ISS.ISS_SECURITIES_AUDIT) for each of the tables in question for those inspections based on internal key field values found in those tables.

6. There are three primary tables in our database that are used for scheduling, assigning and resulting building inspections – ISS_SCHEDULE_INSPECTIONS (used by our inhouse system, inspector and customer web applications and our voice-activated inspection scheduling system to request inspections, ISS_INSPECTOR_APPOINTMENTS (used by our inhouse system and inspector web application to schedule the date and time of an inspection, and ISS_INSPECTION_ACTIVITIES (used by our inhouse system and inspector web application to record the result of a completed inspection).

7. The "ACTION" column tells us when a particular record was inserted (INS) or updated (UPD).

8. The "ACTION USER" column tells us which user performed the action on a record – SELECTRON indicates that a public user (e.g. contractor) using our voice-activated inspection

1 scheduling system to create or update the record, ONLINEINSP indicates that the record was created
2 or updated by a user using the inspector web app, otherwise it's one of our inhouse users.

3 9. The "COLUMN NAME" column tells us which database column in the table was
4 affected.

5 10. OLD DATA" tells us the original state of the database column, while "NEW DATA"
6 tells us what the new state of the database column is.

7 11. Based on the data presented in Exhibit A, Joe Duffy did not make any changes to the
8 inspection that resulted in the CFC issued by Bernie Curran on 08/27/2020.

9
10 I declare under penalty of perjury under the laws of the United States that the preceding
11 declaration is true, and that this declaration was executed on November 17, 2025, at San Francisco,
12 California.
